

Press Release

AUTOWEB SELECTED AS FINALIST FOR SOFTWARECEO AWARDS

ROCHESTER HILLS, Mich. – Autoweb, a global provider of data management and interoperability solutions for the automotive, aerospace and manufacturing industries, is a finalist in the Computing Technology Industry Association's (CompTIA) SoftwareCEO Software Innovation Awards for its Workwise^{CX} software.

Autoweb's Workwise^{CX} is a virtual work area that enables teamwork in a shared virtual space, regardless of location. The software allows users to create rooms with specific business functions, providing a safe, secure and traceable environment to efficiently facilitate collaborative product development initiatives.

The SoftwareCEO Software Innovation Awards recognize innovative software products and new business models in eight different categories. Autoweb's Workwise^{CX} was selected among submitted entries for the category of most innovative small and medium-sized infrastructure software.

Autoweb, headquartered in Rochester Hills, Michigan, is a global software service provider of data management and interoperability solutions that drive productivity and cost reductions within the manufacturing process. Autoweb is responsible for managing its clients most sensitive data. Companies like BAE Systems, Chrysler, Ford, General Motors, Nissan and thousands more currently deploy Autoweb solutions. The Autoweb Network connects manufacturers and their supply chains, with over 20,000 users and 2,600 client companies in 40 countries; Autoweb links the global manufacturing community. For additional information regarding Autoweb, visit www.autoweb.net.
