

AUTOWEB AWARDED THREE-YEAR CONTRACT WITH B/E AEROSPACE

ROCHESTER HILLS, Mich. – Autoweb, a global provider of data management and interoperability solutions for the automotive, aerospace and manufacturing industries, is expanding its presence in the aerospace industry with a contract award from B/E Aerospace.

The three-year agreement will automate the key processes used by B/E Aerospace to manage the translation and exchange of computer-aided design (CAD) data within its enterprise and with its customers and suppliers. Autoweb's Fusion-DX and Global Supplier Network (GSN) Services will replace B/E Aerospace's current manually orientated processes to deliver significant process improvements and waste reductions.

B/E Aerospace will incorporate Autoweb's solution over eight global sites, which will streamline data sharing. The solution will be integrated with B/E's PLM Teamcenter Engineering and NX CAD translation solutions which facilitate end-to-end management of engineering data exchanges via Autoweb's GSN network.

"With these solutions working together, B/E Aerospace is expected to increase productivity throughout their global organization by automating tasks that were previously undertaken manually," said Martyn Davies, VP European Operations of Autoweb. "By employing Autoweb's software as a service model, B/E Aerospace will reduce costs associated with managing these processes and services internally."

The Autoweb solution connects B/E Aerospace with their customers and suppliers via the GSN network –allowing for a two way exchange of CAD data – which is simple and highly secure.

"All of our tools are designed to provide our valued original equipment manufacturer (OEM) customers and their suppliers with the ability to easily expand their use globally through the use of secure internet technologies," Davies noted.

Autoweb clients in the aerospace industry include BAE Systems, B/E Aerospace, BHW Hampson and Pratt & Whitney.

About Autoweb

Autoweb is a global provider of data management and interoperability services for the manufacturing industry, connecting supply chains around the world via a secure, reliable, and traceable communication medium. Autoweb is responsible for thousands of companies' most sensitive information – companies like General Motors, Ford, DaimlerChrysler, Pratt & Whitney, Delphi, Faurecia and thousands more. With over 20,000 users in 48 countries, Autoweb links the global manufacturing community.

About B/E Aerospace

B/E Aerospace, Inc. is the world's leading manufacturer of aircraft cabin interior products, and a leading aftermarket distributor of aerospace fasteners. B/E designs, develops and manufactures a broad range of products for both commercial aircraft and business jets. B/E manufactured products include aircraft cabin seating, lighting, oxygen, and food and beverage preparation and storage equipment. The company also provides cabin interior design, reconfiguration and passenger-to-freighter conversion services. Products for the existing aircraft fleet - the aftermarket - generate about 60 percent of sales. B/E sells and supports its products through its own global direct sales and product support organization. For more information, visit B/E's website at www.beaerospace.com.
