

## Translation Services

---

### Are Autoweb's® Translation Services for you?

- Do you have a need to translate from your native CAD format to that of your trading partners?
- Is your current method of translating files quick, cost effective, and secure?

### Translation Services - Focus on what counts.

As manufacturers increasingly rely upon trading partners to perform design and engineering activities, there is a growing need to share CAD data across organizational boundaries. Most manufacturing supply chains consist of multiple organizations, each employing a preferred CAD authoring tool. In order to support data exchange between multiple organizations, engineers are required to support multiple CAD applications or spend time in non-value-added data translations activities. All of this adds expense and complexity to collaborative design projects.

**Autoweb's® Translation Services** provide a secure means by which to convert CAD data from one format to another in order to streamline and simplify collaborative design efforts. Available as an integrated element of the Intellectual Property Exchange application, Translation Services enables data translation capabilities within the data exchange process eliminating excess complexity and inflated lead times. As a niche solution, Autoweb's Translation Service is scalable and customizable to our client's unique data translations requirements, supporting a wide range of data translations needs from single file translations to large legacy data conversion initiatives.

### Benefits

#### **Streamline data exchange processes**

- Integration to Autoweb's Intellectual Property Exchange application enables seamless data translations reducing cost and complexity

#### **Increase data security**

- Integration to Autoweb's secure network increases data visibility throughout the data transmission process
- Eliminate untraceable 3rd party data translations providers

#### **Outsource non-value added activities**

- Free resources to concentrate on core competencies

## Translation Services

---

### Features

#### Supports multiple formats, including:

- AutoCAD
- AutoTrol
- CADD55
- Catia V4
- Catia V5
- IGES
- JT
- PDGS
- I-deas
- SolidWorks
- STEP
- STL
- NX

...and many more

#### Multiple distribution methods

- Autoweb Intellectual Property Exchanges
- CD, DAT, ZIP

#### Online Translations Request Form

- Request a personalized data translation solution at [www.autoweb.net](http://www.autoweb.net)

Like all of Autoweb's products and services, Translation Services can be easily accessed through the Autoweb Gateway with a simple internet connection.

### Autoweb Overview

Autoweb is a leading global provider of engineering data management and exchange services. With over 20,000 users from more than 2,800 companies in 45 countries, Autoweb connects the global manufacturing community. Thousands of companies trust Autoweb with their most sensitive intellectual property including:

- BAE Systems
- Daewoo
- DaimlerChrysler
- Delphi
- Faurecia
- Ford
- General Motors
- Honda
- Honeywell Aerospace
- Mercedes-Benz
- Mitsubishi
- Nissan
- Pratt & Whitney
