9:00 - 16:00
University of Warwick
Coventry, UK

IMPROVING INTEGRATION THROUGH COMMUNICATION

an *AUTOWEB* seminar

Seminar Objective:

To be a forum for engineering professionals to discuss industry issues and learn about processes that can help:

- Improve supply chain collaboration
- Integrate CAD, PLM, ERP and communication systems
- Diminish the effects time and space have on extended enterprises
- Reduce costs and improve product development lead times

Who Should Attend:

Directors and managers in product design, engineering and manufacturing companies who are responsible for:

- Data management
- Product design processes
- Supply chain collaboration
- Product lifecycle management

- Seminar agenda to include:**
- The business of improving supply chain integration
 - Integration options and selection recommendation
 - Supply chain communication “At Your Fingertips”
 - Real-time collaboration in the extended enterprise
 - Industry case studies from Autoweb customers
 - Refreshments and lunch will be provided
